- Fair use means that an edpnet Mobile subscription is only intended for individual use by a private edpnet customer. It is not intended for use that is inconsistent with that expected of a normal private user. In case of unreasonable use, edpnet reserves the right to suspend and / or terminate the agreement and / or to take other measures. For more details, we refer to article 13.3 of the [edpnet Mobile conditions](#).

Speeds of the internet service and remedies

Maximum estimated speed:

- o 2G: 254 Kbps download / N/A upload
- o 3G: 34 Mbps download / 4,3 Mbps upload
- o 4G: 350 Mbps download / 70 Mbps upload
- o 5G: 1 Gbps download / 95 Mbps upload

The maximum estimated speed is the value of the speed that the edpnet Mobile customers can expect in different places of the covered territory under realistic usage conditions. These values were determined by Orange based on objective measurement campaigns and are the average of the measurements carried out over the territory. In certain cases, the customer may not reach these maximum values due to possible limitations of the mobile equipment. Other factors influencing the maximum estimated speeds are the number of co-users connected to the same cell tower at the same time and the type of service the customer uses (Apps, website, e-mail services). The distance between the end-user device and the cell tower, the geographic and climatic conditions, the indoor use (including the characteristics of the building) and the outdoor use of the mobile service also affect the speed reached at a given location at a given moment.
